

# Austube

Since 1994, Austube linear lighting systems has been manufacturing high performance extrusion based luminaires that incorporate cutting edge technologies to create innovative and intelligent lighting solutions for our clients.

We are one of the leading companies in Australia that specialises in aluminium luminaire extrusion, and our dedication to perfection in this area shines through in every project we deliver.

Where other companies simply deliver products, we truly partner with our clients with proactive, collaborative service, and high touch customer solutions.

We believe in the power of linear extrusions  
to transform spaces.

# The Austube Difference

50 Highly experienced and knowledgeable staff across our sales and manufacturing operation

4500m<sup>2</sup>

Australian manufacturing facility that encompasses state of the art machinery

25+

Years working with clients to deliver high quality, custom light packages

# The Austube guiding mission

We strive to be a guiding light in an industry where change is constant.

Everything we do revolves around the customer. We are a true partner every step of the way with our proactive, collaborative service, and high touch customer solutions. We value relationships above all else, we listen.

The Austube team prides itself on three key principles

## 1. PARTNERSHIPS

Creating valued and trusted PARTNERSHIPS with our clients. We're a proactive partner - we think ahead, anticipate future needs, identify possible outcomes, and create solutions.

## 2. EXPERTISE

Offering outstanding EXPERTISE in technology, manufacturing, and product solutions. We inform and educate – we are thoughtful, helpful, and design using the latest high class performing technology in all our products, and we share our expertise.

## 3. DELIVERY

Excelling in DELIVERY via best in class end to end project management. Our high-touch customer service makes every interaction matter, we are reliable and proven performers and we go the extra mile.

We believe in specialisation, living and breathing extrusions to deliver custom light packages that exceed expectations.

**Austube is proud to be an Australian manufacturer, supporting local people and supplying Australian made products.**

Accredited to ISO9001:2015, our quality systems are founded on rigorous quality and inspection standards, ensuring every product we produce exceeds compliance and meets our customers' high standards.

**Our in-house design and engineering team is dedicated to continually developing new and exciting products in response to new technologies as they become available.**

We pride ourselves on sharing our knowledge and developments in lighting design, circadian technologies, glare control, colour quality, and changing building and wellness standards.

**Our ability to design and manufacture custom made luminaires that are project specific are unmatched.**

From the moment we successfully designed and delivered the iconic light towers that surrounded Sydney Olympic Park at the 2000 Olympic Games, we have been rising to the challenge of creating functional and beautiful lighting installations. More recent examples include the Brisbane Supreme Court redevelopment, Wynyard and Town Hall Stations in Sydney, and the National Gallery of Australia.

#### Kwik Lock

Where light becomes art, Kwik Lock technology ensures a striking effect with no light leaks through joins. A sharp and clean result, every time.

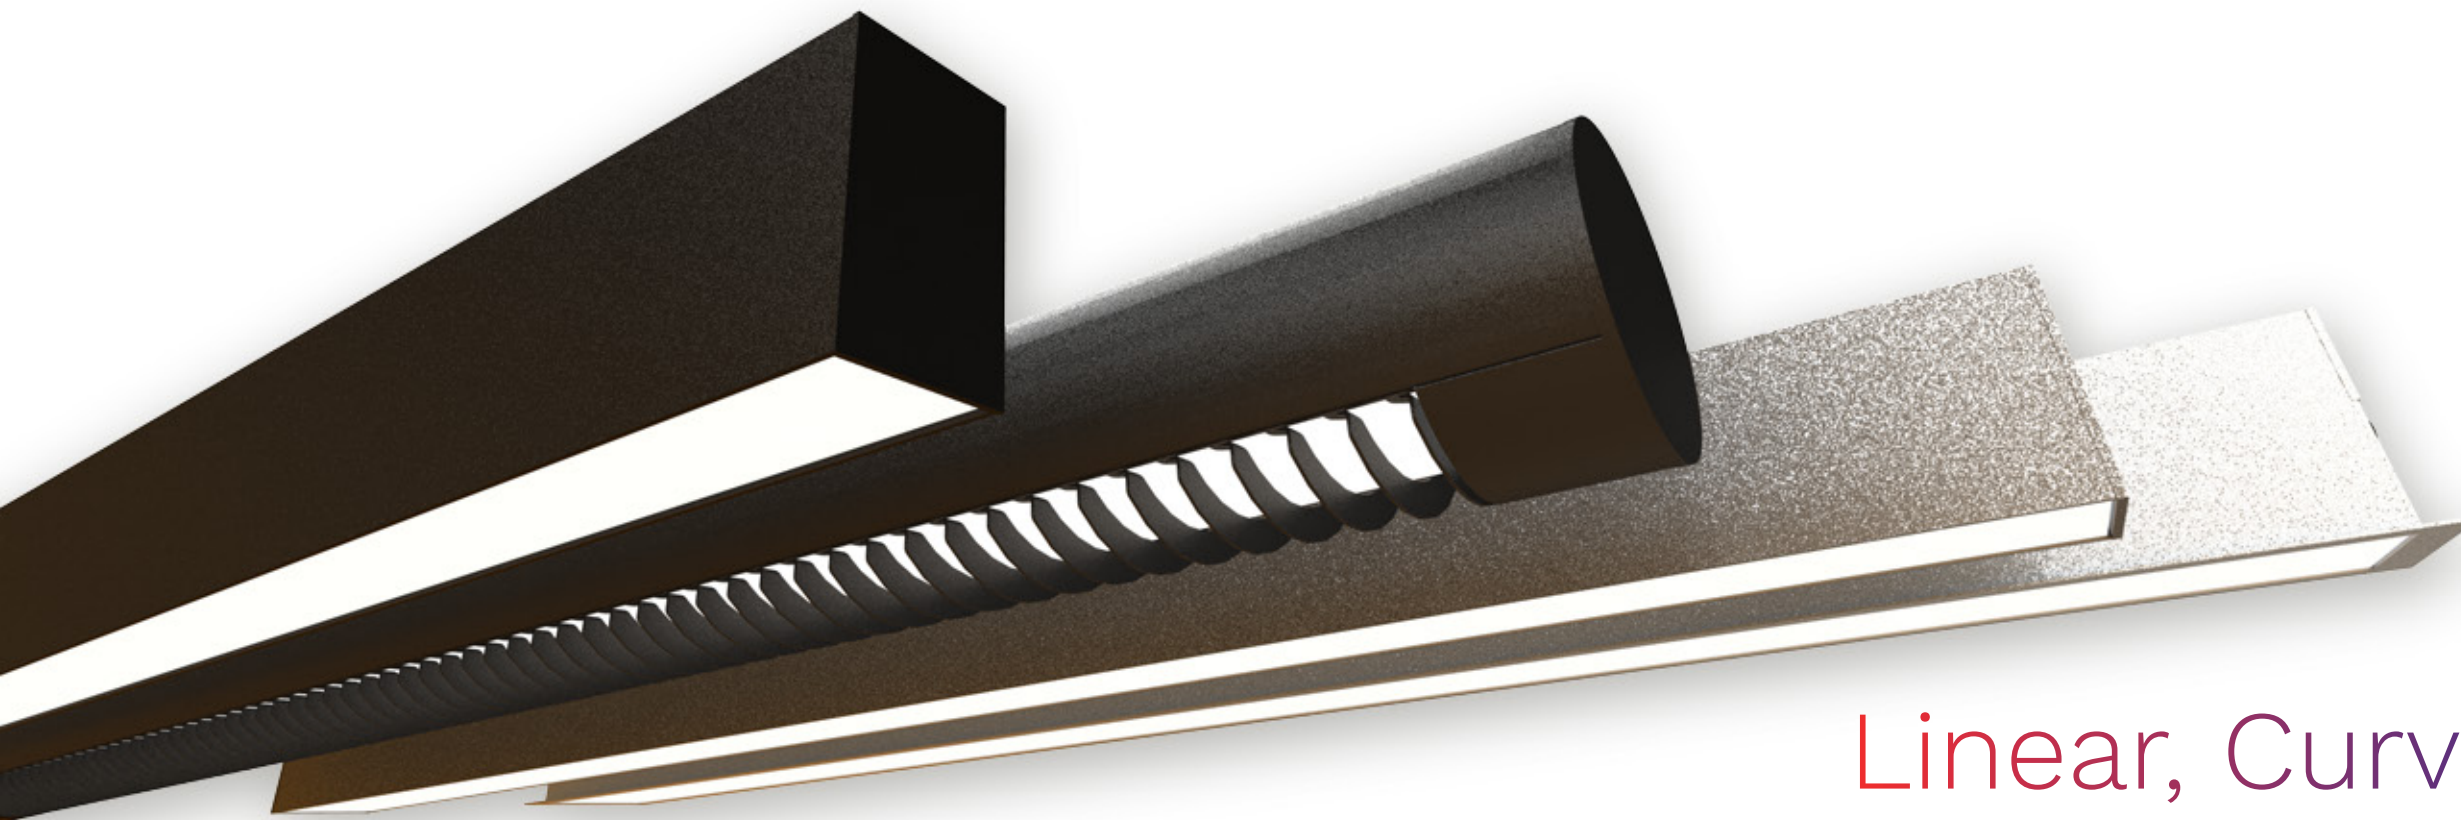

#### Flip Chip Technology

We embrace Flip Chip Technology that Improves our LED light output and durability

#### Surge Protection

All Austube products are manufactured with a standalone Surge Protection Device (SPD) on each driver for added protection against voltage surges.

# Linear, Curved, Recessed, Round, Square, Suspended

We have it covered! Our products offer increased performance, architectural lines, and engineering excellence.

- World Class Performance
- Custom Built
- Designed in Australia
- Manufactured in Australia
- Integrated Smart Controls
- Flip Chip Technology
- Best-in-Class Efficacy and Long-Life

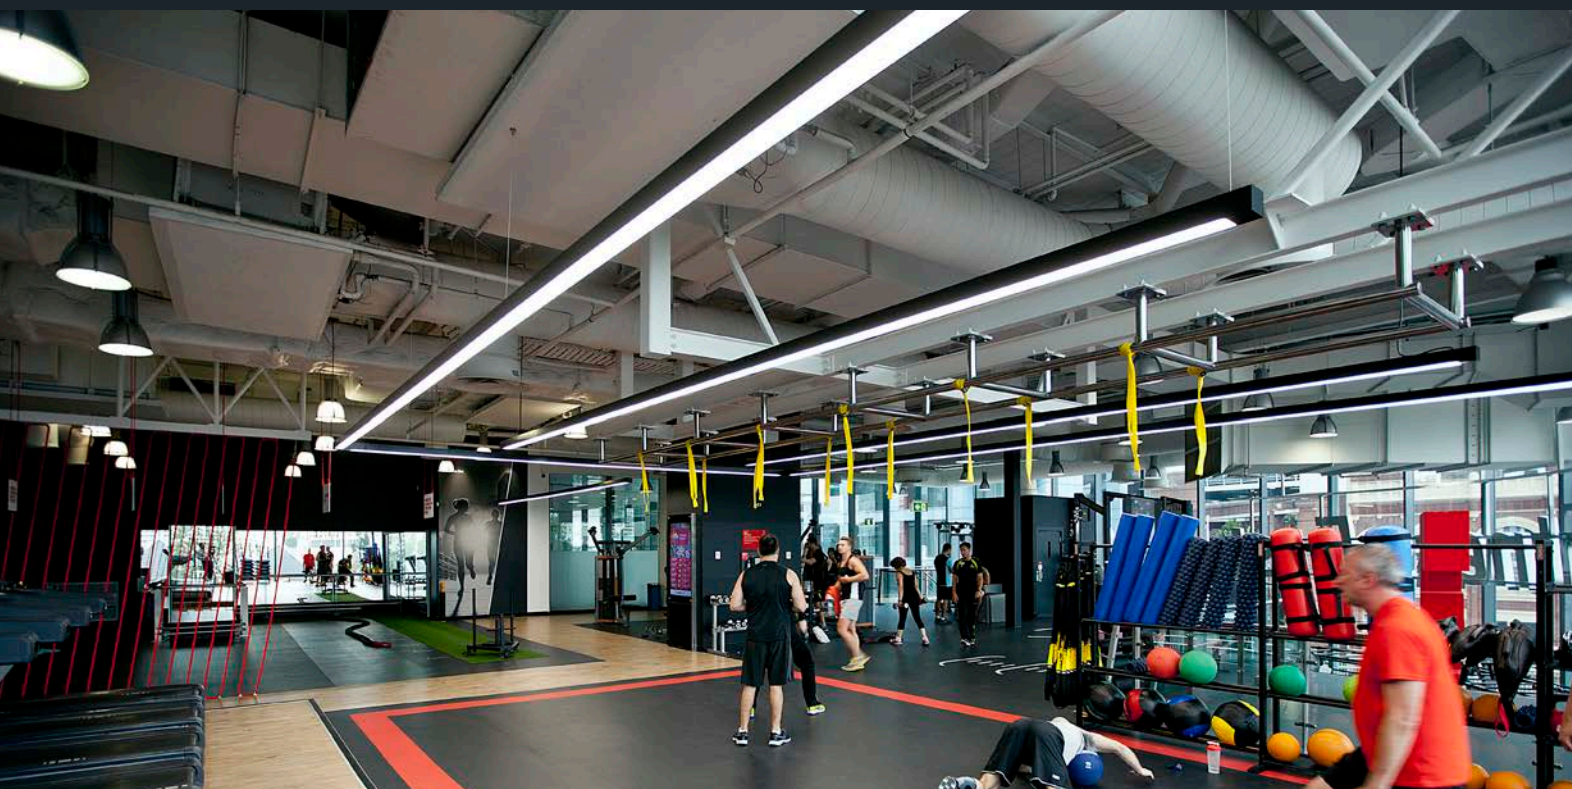

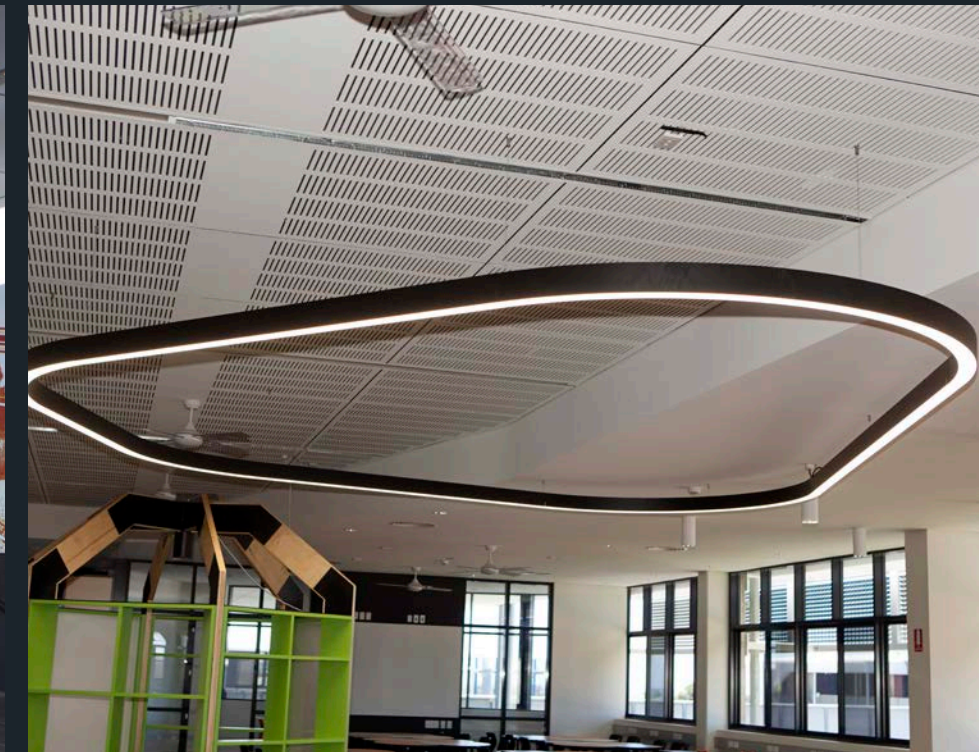

# Inspired Experience

Our customer's project ambitions have led to some groundbreaking product and technological developments within the Austube portfolio. Every project that we complete helps to inform a new level of excellence on the next. By truly understanding the requirements of a project, we can adapt and expand on our offering to deliver over and above for our clients.

Our agile and adaptive approach to product development is what allowed us to develop a bespoke luminaire that complied to WELL standards for UGR, circadian colour mimicking and power efficiency for ACT's Constitution Place. This approach was also the driving force for fulfilling the needs of Sydenham Station, which required a seamless integration of lighting, speakers, cameras and cableways.

Intimate knowledge and capability in lighting doesn't happen overnight. Our 25+ years of experience in lighting purpose and possibilities have led to a deep understanding of and daily exposure to concepts such as unified glare rating, WELL Standard, NCC Section J and various other industry standards.

Great lighting is all about the feel within, and effect on, a space. The more considered the approach to illumination, the better its occupants are able to live, work and thrive within. Behind many iconic projects in Australia, Austube stands strong as a true project partner. We're proud of every project, including supplying the lighting for the Sydney 2000 Olympics, the Brisbane Supreme Court, and ACT's only gold-rated WELL and 5-star NABERS energy rated precinct, Constitution Place.

# Our Partners

At Austube, we work closely with Specifiers, Contractors, and Electrical Engineers to bring our clients the best lighting solution with a sustainable future.

Austube is dedicated to our people, project partners, and the communities in which we work. We ensure our product solutions are engineered and manufactured to ISO standards to deliver on promises of reduced carbon emissions, smaller carbon footprint, reduce operational costs.

# Next generation thinking for a sustainable future

The principle of our family company Schröder, is to hand it over from generation to generation, with each generation contributing to making the business and its surrounding communities healthier and better. Our commitment to sustainability is based on this next-generation thinking: we continually innovate and change the way we look at the world through entrepreneurship.

From energy efficiency at the advent of electricity to creating solutions that are more resilient in the age of data, we constantly adapt our sustainability policy to help customers face their bigger challenges.

We believe in the power of partnering with clients for the best possible project outcome.
